

IN THE SPECIFICATION:

Please amend the specification as follows:

Paragraph beginning on page 4, at prenumbered line 22, has been amended as follows:

As shown on FIG. 2, the cooling fan (1) has a knob or a touch button (16) installed outside the stator frame (12), enabling the front end (162) of the knob or the touch button ~~exploded~~exposed outside the stator frame (12). The power source can be connected to the power supply of a computer through the fan power cord (17). Therefore, the cooling fan can ~~control~~be controlled by the knob or the touch button (16) interface enabling a user to adjust fan speed of the cooling fan at any time without a huge change of the original fan structure, using method and fan positioning.
